As in prior years, we continue to offer our full line of 1099 and W-2 services if you choose to utilize them. We are following electronic filing procedures for all federal 1099s and W-2s in an effort to streamline the process. This means that you will most likely receive only the recipients' copies and a file copy for your records.

While we are happy to provide our business clients with 1099 and W-2 preparation and filing services, we realize that many companies have only one or two forms to prepare and it is more cost effective for them to do the annual tax filings themselves.

The IRS [website](#) lists a variety of websites who offer cost effective and automated W-2 and 1099 preparation for preparing up to 100 forms for electronic preparation and filing, as well as the ability to print a hard copy for your files and for any recipients. While we have not used the sites ourselves, the following are resources our clients have used in recent years:
